User Requirements

- The system will be composed of the following key components: home page, review page, search bar, add to card and about us.
- Librarians will be able to print bills for each book sold to the customer, allowing for accurate record-keeping of transactions.
- Managers shall have the capability to add new books to the system, including relevant details such as title, author, genre, and quantity.
- Managers must be able to monitor the performance of librarians, including tracking the number of bills printed, data for books sold and total revenue on a daily basis.
- Managers will have access to statistics regarding books sold and bought, including information about name of the book, quantity and price.
- Admins will have the authority to manage employee accounts, including the ability to add, delete, or modify employee data as needed.
- The system should provide a user-friendly interface for all user roles, ensuring ease of navigation and efficient access to functionalities.
- The system shall maintain a secure login process to protect sensitive data and ensure that only authorized users can access the system.
